Yoga has a rich, 5,000-year history and on the grounds that it is a particularly multi-layered practice, which has in the past entwined with religion, theory and obviously work out, nailing down a definite beginning has demonstrated troublesome. Yoga is basically a profound order that focuses on inconspicuous science that spotlights on accomplishing congruity between a person's brain and body. The word Yoga initially showed up in the most established holy messages, the Rig Veda and is gotten from the Sanskrit root "Yuj" which means join or join together. As per the Yogic sacred texts, the act of Yoga drives a person to the association of awareness with that of general Consciousness. It ultimately prompts an extraordinary amicability between the human psyche and body, man and nature.

Biology majors and pre-health students at many colleges and universities are required to take a semester of calculus but rarely do such students see authentic applications of its techniques and concepts. Applications of Calculus to Biology and Medicine: Case Studies from Lake Victoria is designed to address this issue: it prepares students to engage with the research literature in the mathematical modeling of biological systems, assuming they have had only one semester of calculus. The text includes projects, problems and exercises: the projects ask the students to engage with the research literature, problems ask the students to extend their understanding of the materials and exercises ask the students to check their understanding as they read the text. Students who successfully work their way through the text will be able to engage in a meaningful way with the research literature to the point that they would be able to make genuine contributions to the literature. Our mission: to make math a fun part of kids' everyday lives. We all know it's wonderful to read bedtime stories to kids, but what about doing math? Many generations of Americans are uncomfortable with math and numbers, and too often we hear the phrase, "I'm just not good at math!" For decades, this attitude has trickled down from parents to their kids, and we now have a culture that finds math dry, intimidating, and just not cool. Bedtime Math wants to change all that. Inside this book, families will find fun, mischief-making math problems to tackle—math that isn't just kid-friendly, but actually kid-

appealing. With over 100 math riddles on topics from jalapeños and submarines to roller coasters and flamingos, this book bursts with math that looks nothing like school. And with three different levels of challenge (wee ones, little kids, and big kids), there's something for everyone. We can make numbers fun, and change the world, one Bedtime Math puzzle at a time.
