and the early civilizations of the Aegean, The Penguin History of Europe traces the development of European identity in its many guises, through the age of Christendom, the Middle Ages, early Modern history and the old European order. First published in 1935, this is widely regarded as the most definitive and comprehensive biography of Maximilien François Marie Isidore de Robespierre (1758-1794), the French lawyer and politician who would become one of the best-known and most influential figures associated with the French Revolution and the Reign of Terror. As a member of the Estates-General, the Constituent Assembly and the Jacobin Club, Robespierre was an outspoken advocate for the poor and for democratic institutions. He campaigned for universal male suffrage in France, price controls on basic food commodities and the abolition of slavery in the French colonies. He played an important role in arranging the execution of King Louis XVI, which led to the establishment of a French Republic. Perhaps best known for his role in the French Revolution's Reign of Terror, he was named as a member of the powerful Committee of Public Safety launched by his political ally Georges Danton and exerted his influence to suppress the left-wing Hébertists. As part of his attempts to use extreme measures to control political activity in France, Robespierre later moved against the more moderate Danton, who was accused of corruption and executed in April 1794. The Terror ended a few months later with Robespierre's arrest and execution in July, events that initiated a period in French history known as the Thermidorian Reaction. This traditional biography is filled with extensive and reliable research on the man whose steadfast adherence and defense of the views he expressed earned him the nickname l'Incorruptible (The Incorruptible). Unmissable reading.

This second edition is thoroughly updated, and includes extended coverage of European integration, the rise of supra-governmental organizations, and the 'global War on Terror'.

Social, economic and cultural aspects are integrated within a framework of political narrative, and the book aims to present major themes through sharp detail rather than abstract generalizations.

Motherhood in Mexico is profoundly shaped by the legacy of colonialism. This ethnography situates motherhood in a critical global health analysis of maternal health inequalities and interventions in the southeast state of Chiapas. Using a transitional life course framework, it demonstrates how the transition to motherhood is never complete. Once a good mother is defined, she becomes undefined, the goal posts moved, and the rules confronted.

Jean-Yves Camus and Nicolas Lebourg's critical look at the far right throughout Europe reveals a prehistory and politics more complex than the stereotypes suggest and warns of the challenges it poses to the EU's liberal-democratic order. These movements are determined to gain power through legitimate electoral means, and they are succeeding.

our time--that Europe rose to modernity and world dominance due to unique qualities of race, environment, culture, mind, or spirit, and that progress for the rest of the world resulted from the diffusion of European civilization. J. M. Blaut persuasively argues that this doctrine is not grounded in the facts of history and geography, but in the ideology of colonialism. Blaut traces the colonizer's model of the world from its 16th-century origins to its present form in theories of economic development, modernization, and new world order.

The nature of social democracy in the countries of the European Union is more significant and better understood than is indicated by the available literature. This thought-provoking handbook aims to redress this disparity by bringing together Political scientists from across Europe to provide a definitive collection on social democracy in the EU.

This account of developments in the modern era begins with the European Renaissance, and traces developments across the centuries of empire, industrial innovation, revolutions and world wars, through to the emergence of a fast-changing, inter-connected and non-Eurocentric world beset with environmental concerns. The Oxford Handbook of Women and Gender in Medieval Europe provides a comprehensive overview of the gender rules encountered in Europe in the period between approximately 500 and 1500 C.E. The essays collected in this volume speak to interpretative challenges common to all fields of women's and gender history - that is, how best to uncover the experiences of ordinary people from archives formed mainly by and about elite males, and how to combine social histories of lived experiences with cultural histories of gendered discourses and identities. The collection focuses on Western Europe in the Middle Ages but offers some consideration of medieval Islam and Byzantium. The Handbook is structured into seven sections: Christian, Jewish, and Muslim thought; law in theory and practice; domestic life and material culture; labour, land, and economy; bodies and sexualities; gender and holiness; and the interplay of continuity and change throughout the medieval period. It contains material from some of the foremost scholars in this field, and it not only serves as the major reference text in medieval and gender studies, but also provides an agenda for future new research.
