This new, comprehensive medical assisting text with supplemental materials provides an innovative, interactive, visual, well-written package focusing on the impact of managed care and current health care trends. It reflects a realistic perspective of the busy medical office environment in which today's medical assistants work. The book is logically organized to follow the way a patient moves through the medical office, from the time they check in at the front desk, to their clinical experience, and back to the front desk for checkout. Each chapter refers students to internet resources and is linked to various supplements for further study and practice. Unique organization of content is arranged logically according to the way a patient moves through the medical office. Even though the material is oriented to the patient's experience, material can be easily presented in a more traditional format.* Updated content on federal legislation regulating health care providers, managed care trends, and bioethical issues is included, helping students to learn the current information that will guide their performance in the workplace. Each chapter identifies the CMA (AAMA) and RMA (AMT) content and competencies, helping students and instructors focus their attention as they read and study. Enrichment topics on relevant nice-to-know subjects such as new medical trends, diagnostics, treatments, diseases, etc., add interest and current information. Focus On boxes include information on communication, instruction, legal concepts, professionalism, and safety that is important for the student to know. These topics are common threads through each chapter. On the Job boxes showcase scenarios using characters from the fictitious medical practice and/or the Saunders Medical Assisting Critical Thinking Video Series (due to publish 10/01) to check on the student's comprehension of the previous material and to challenge critical thinking skills, helping students apply new knowledge to real situations. Student study plans contain exercises at the end of each chapter that help the student to review and use information and skills gained from the chapter to answer critical thinking questions and what if? questions. Students are also referred to supplemental materials. Explore the Web boxes list key words for internet searches and internet websites for further student study and research.

Corresponding to the chapters in the main Bonewit text, Study Guide for Today's Medical Assistant, Clinical & Administrative Procedures, 3rd Edition features a variety of practical exercises, activities, checklists, review questions, and more to help users master important medical assisting knowledge and skills. This comprehensive study guide has been thoroughly updated to reflect the 2015 CAAHEP competencies and key areas of practice, such as: electronic medical records, HIPAA regulations, advanced directives, emergency preparedness, ICD-10 coding, billing documentation, medical office technology, medical asepsis, vital signs, pediatric immunizations and injections, colonoscopy procedures, IV therapy, and CLIA waived tests. Consistent, meticulous study guide coverage aligns seamlessly with the main Bonewit text and all other Bonewit solution learning products. Evaluation of Competency checklists assess readers' performance versus stated objectives and performance standards. Critical thinking activities encourage readers to think outside the box and imagine what they would do in real-life situations. Laboratory assignments at the beginning of each chapter give readers a guide on each chapter's procedures, including guidelines on how many practices are required, which study guide pages correlate to the procedure, and which procedures are also in the procedural videos. Key term assessment tests readers' knowledge of the terms presented in the main text. Evaluation of Learning questions assess readers' progress and are an excellent tool to prepare for the certification exam. Practice for Competency checklists help readers practice each of their clinical skills. Pharmacology math exercises give readers a chance to practice their basic math skills in a way that relates to their future job. Chapter assignment tables at the beginning of each chapter guide readers through the textbook and study guide chapters, and provides a great tracking device for recording progress of textbook reading assignments and study guide activity assignments. NEW! Updated material aligned to most current CAAHEP and ABHES competencies ensures success and employability for today's medical assistants. NEW! Material from the chapter on nutrition is also incorporated into the accompanying study guide material. NEW! Updated content on emergency preparedness and medical records ensure readers are up-to-date on these key topics. NEW! Application to SimChart for the Medical Office where appropriate allows readers to prepare for the real world by working on Elsevier's own educational EHR. NEW! Expanded A&P key terminology sections give readers ample A&P key term practice.
