Modern-day Israel, and the Jewish community, are strongly influenced by the memory and horrors of Hitler and the Holocaust. Burg argues that the Jewish nation has been traumatized and has lost the ability to trust itself, its neighbors or the world around it. He shows that this is one of the causes for the growing nationalism and violence that are plaguing Israeli society and reverberating through Jewish communities worldwide. Burg uses his own family history--his parents were Holocaust survivors--to inform his innovative views on what the Jewish people need to do to move on and eventually live in peace with their Arab neighbors and feel comfortable in the world at large. Thought-provoking, compelling, and original, this book is bound to spark a heated debate around the world.

The story of a southern belle gone wrong presents the shocking tale of Patricia Vann Radcliffe Taylor Allanson, who tried to murder members of her own family to get what she wanted

It began as an intriguing piece of puzzle-solving - and ended with the discovery of the greatest secret of all. Dissatisfied with the explanations of previous researchers, Richard Andrews and Paul Schellenberger applied mathematical logic to the enduring mystery of the Rennes-le-Chateau and the 'treasure' alleged to be buried there. The quest began with an investigation into the activities of a group of 19th century priests who had become embroiled in the legend. These priests had grown rich because of their involvement and had maintained the anonymity of the paymasters, but in 1993 an extraordinary clue came to light which suggested the priests were engaged in activities at odds with traditional Roman Catholic pastimes. A series of paintings was unearthed which incorporated a cryptic, obscure geometry; a set of interrelating shapes with a very direct link to the priests' habitat and spiritual role. Through the centuries a pattern emerged - a web of concealment on maps, in fine art, on tombstones which defied coincidence and pointed to one very specific location...

"Christina Moore uses her talent for storytelling to create a more narrative-like tale....An attractive offering for listening centers and for young children interested in nature and science." -School Library Journal

The author of eight New York Times bestsellers, Ann Rule first won nationwide acclaim with *The Stranger Beside Me*, about serial killer Ted Bundy. Her *Crime Files* volumes, based on fascinating case histories, have assured her reputation as our premier chronicler of crime. Now the former Seattle policewoman brings us the horrific account of a charismatic man adored by beautiful and brilliant women who always gave him what he wanted...sex, money, their very lives.... When attorney Cheryl Keeton's brutally bludgeoned body was found in her van in the fast lane of an Oregon freeway, her husband, Brad Cunningham, was the likely suspect. But there was no solid evidence linking him to the crime. He married again, for the fifth time, and his stunning new wife, a physician named Sara, adopted his three sons. They all settled down to family life on a luxurious estate. But gradually, their marriage became a nightmare.... In this gripping account of Cheryl's murder, Ann Rule takes us from Brad's troubled boyhood to one of the most bizarre trials in legal history, uncovering multiple marriages, financial manipulations, infidelities, and monstrous acts of harassment and revenge along the way. *Dead By Sunset* is Ann Rule at her riveting best.

The New York Times bestseller that makes scientific subjects both understandable and fun: "Every sentence sparkles with wit and charm." —Richard Dawkins From the Pulitzer Prize-winning New York Times science journalist and bestselling author of *Woman*, this is a playful, passionate guide to the science all around us (and inside us)—from physics to chemistry, biology, geology, astronomy, and more. Drawing on conversations with hundreds of the world's top scientists, Natalie Angier creates a thoroughly entertaining guide to scientific literacy. For those who want a fuller understanding of some of the great issues of our time, *The Canon* offers insights on stem cells, bird flu, evolution, and global warming. For students—or parents whose kids ask a lot of questions about how the world works—it brings to life such topics as how the earth was formed, or what electricity is. Also included are clear, fascinating explanations of how to think scientifically and grasp the tricky subject of probability. *The Canon* is a joyride through the major scientific disciplines that reignites our childhood delight and sense of wonder—and along the way, tells us what is actually happening when our ice cream melts or our coffee gets cold, what our liver cells do when we eat a caramel, why the horse is an example of evolution at work, and how we're all really made of stardust.

In the 1960s the Air Force buried 1,000 ICBMs in pastures across the Great Plains to keep U.S. nuclear strategy out of view. As rural civilians of all political stripes found themselves living in the Soviet crosshairs, a proud Plains individualism gave way to an economic dependence on the military-industrial complex that still persists today.

Written in an accessible, journalistic style, *Jihad in Paradise* focuses on Southeast Asia's struggle to deal with Islamic extremists and terrorism at the hands of Jemah Islamiyah,

al Qaeda's Southeast Asian arm. Although the book gives particular attention to Singapore's attempts to deal with these issues, the story extends into Malaysia, Indonesia, and the Philippines. All of these countries have significant Muslim populations, and recent violent events have affected the business environment, tourism, and the region's tradition of religious tolerance. The author draws on personal interviews with experts in the field as well as key political and religious figures in Singapore, Malaysia, and Indonesia, including Prime Minister Lee Kuan Yew, Minister for Muslim Affairs Jaacoub Ibrahim, and expelled Muslim dissident Zulfikar Mohamad Sharif. Millard examines the Bali bombing, Malaysia's conservative Islamic party PAS, the Malaysian province of Kelantan which is a Muslim political hotbed, Abu Saayaf of the Philippines, and Fateha.com and the use of the Internet. He also provides a glimpse of how Singapore, the region's most developed nation, has engineered its society in order to impose a degree of racial and religious tolerance.

One hundred of hilarious and funny jokes ! Have fun and laugh!

Haunting, gripping, and psychologically fierce tales that illuminate an unsettling side of humanity from “one of the treasures of American story writing” (Jonathan Lethem).

Featuring the O. Henry Prize–winning short story “Windeye,” this collection of Brian Evenson’s masterful stories “involve impossible scenarios and alternative realities” that are “always surprising” (Bookforum). A woman falling out of sync with the world; a king’s servant hypnotized by his murderous horse; a transplanted ear with a mind of its own—the characters in these twenty-five stories live as interlopers in a world shaped by mysterious disappearances and unfathomable discrepancies between the real and imagined, revealing the breadth and depth of Evenson’s uncanny vision.

The material for these volumes has been selected from the past twenty years' examination questions for graduate students at University of California at Berkeley, Columbia University, the University of Chicago, MIT, State University of New York at Buffalo, Princeton University and University of Wisconsin.

The second edition of Lives of Museum Junkies brings a behind the science look at science centers up to date with the confusion, fears, and budget constraints caused by COVID-19. By peering into the political and educational climate of the 1960s readers discover factors that propelled the hands-on education movement into prominence. Follow the missteps and breakthroughs of Marilynne Eichinger and 11 other naive but dedicated museum directors, board volunteers, and National Science Foundation managers as they strove to change the way science was taught. Their oft humorous stories are revealed with candor and clarity. Responding to the latest research in learning and child development, they created engaging, self-teaching displays that impacted the landscape of 2,900 centers worldwide while serving 98 million people in the U.S. Through the centers have evolved with increased virtual offerings, there remain concerns that one-third of these centers will have to close their doors.

China is the world's leading emitter of heat-trapping gases by a wide margin. There is no solution to climate change without China. In his Guide to Chinese Climate Policy, David Sandalow examines China's emissions, explores the impacts of climate change in China, provides a short history of China's climate policies and discusses China's principal climate policies today. This up-to-date Guide is an invaluable resource for anyone interested in China, climate change or both. "This comprehensive guide by a leading authority on the climate change policies of China, the world's largest emitter of greenhouse gases, is the most up-to-date reference available, and belongs on the desks and bookshelves of researchers and practitioners alike." -- Robert Stavins, A. J. Meyer Professor of Energy and Economic Development, John F. Kennedy School of Government, Harvard University "David Sandalow's extraordinary energy and environmental expertise coupled with his rich governmental experience at the Department of Energy, State Department and National Security Council are reflected in his Guide to Chinese Climate Policy 2019. His fact-packed analysis of China's climate policies, both good and bad, and how they compare with other nations' policy efforts, is invaluable. Professor Sandalow's excellent study is extremely timely and deserves a high level of attention." -- Amb. Carla Hills, Chair, National Committee on US-China Relations and former US Trade Representative "This is an excellent, readable, practical discussion of climate policy in a country whose climate policy is an indispensable ingredient to combatting climate change. David Sandalow is the perfect guide, deeply knowledgeable about China and practiced in the hands-on business of climate and energy diplomacy." -- Todd Stern, Senior Fellow, Brookings Institution and former US Special Climate Envoy "In the global effort to protect the climate, no country matters more than China. David Sandalow has written the definitive guide to Chinese actions--both at home and abroad. Impressive in scope and depth, Sandalow's study puts a spotlight on many important signs of progress along with some challenges that are deeply worrying." - David Victor, Professor of International Relations, University of California at San Diego and Co-Chair, Brookings Initiative on Energy and Climate Change "The energy transformation going on in China is critical to whether the world succeeds or fails in solving the climate crisis and that is why David Sandalow's important, authoritative and timely Guide to that transformation is so welcome." -- John Podesta, Founder and Director, Center for American Progress "David Sandalow's Guide to Chinese Climate Policies 2019 succeeds in achieving a seemingly impossible goal - to provide a concise, clear, and objective explication and evaluation of China's wide-ranging, multifaceted policies to address climate change. This deeply researched volume is a truly outstanding resource for anyone interested in this vitally important topic." -- Kenneth Lieberthal, Professor Emeritus, University of Michigan "David Sandalow's Guide to Chinese Climate Policy provides a comprehensive and insightful overview of both the positive and not-so-positive recent developments in China as it balances economic growth and

development with climate change mitigation goals." - Nan Zhou, Head, International Energy Analysis Department, Lawrence Berkeley National Laboratory

It is an age of hurry and worry. Fortunes are quickly made and freely spent. Nearly all busy, hard-worked Americans have an intuitive sense of the need that exists for at least one period of rest and relaxation during each year, and all—or nearly all—are willing to pay liberally, too liberally in fact, for anything that conduces to rest, recreation and sport. I am sorry to say that we mostly get swindled. To the man of millions it makes little difference. I do not write for him, and can do him little good. But there are hundreds of thousands of practical, useful men, many of them far from being rich; mechanics, artists, writers, merchants, clerks, business men—workers, so to speak—who sorely need and well deserve a season of rest and relaxation at least once a year. To these, and for these, I write. (George Washington Sears, Chapter I)

"Hoptopia argues that the current revolution in craft beer is the product of a complex global history that converged in the hop fields of Oregon's Willamette Valley. What spawned from an ideal environment and the ability of regional farmers to grow the crop rapidly transformed into something far greater because Oregon farmers depended on the importation of rootstock, knowledge, technology, and goods not only from Europe and the Eastern United States but also from Asia, Latin America, and Australasia. They also relied upon a seasonal labor supply of people from all of these areas as a supplement to local Euroamerican and indigenous communities to harvest their crops. In turn, Oregon hop farmers reciprocated in exchanges of plants and ideas with growers and scientists around the world, and, of course, sent their cured hops into the global marketplace. These global exchanges occurred not only during Oregon's golden era of hop growing in the late nineteenth and early twentieth centuries, but through to the present in the midst of the craft beer revival. The title of this book, Hoptopia, is a nod to Portland's title of Beervana and the Willamette Valley's claim as an agricultural Eden from the mid-nineteenth century onward. But the story is fundamentally about how seemingly niche agricultural regions do not exist and have never existed independently of the flow of people, ideas, goods, and biology from other parts of the world. To define Hoptopia is to define the Willamette Valley's hop and beer industries as the culmination of all of this local and global history. With the hop itself as a central character, this book aims to connect twenty-first century consumers to agricultural lands and histories that have been forgotten in an era of industrial food production"--Provided by publisher.

In David Sedaris' world, no one is safe and no cow is sacred. A manic cross between Mark Leyner, Fran Lebowitz, and the National Enquirer, Sedaris' collection of essays is a rollicking tour through the national Zeitgeist: a do-it-yourself suburban dad saves money by performing home surgery; a man who is loved too much flees the heavyweight champion of the world; a teenage suicide tries to incite a lynch mob at her funeral; a bitter Santa abuses the elves. David Sedaris made his debut on NPR's Morning Edition with "SantaLand Diaries", recounting his strange-but-true experiences as an elf at Macy's, and soon became one of the show's most popular commentators. With a perfect eye and a voice infused with as much empathy as wit, Sedaris writes stories and essays that target the soulful ridiculousness of our behavior. Barrel Fever is like a blind date with modern life, and anything can happen.

Portrays the migration of a Puerto Rican family from the countryside to the San Juan ghetto and eventually to Spanish Harlem in New York City.

A critique of America's flawed Asia policy that centres on US-Japan relations but harkens back to the same disastrous views that drew America into Vietnam. The technique is a narrative flow of short vignettes woven into longer chapters; the main strands are personal reflections and interviews.

This collection brings together some of the most influential sociologists of law to confront the challenges of current transnational constitutionalism. It shows the constitution appearing in a new light: no longer as an essential factor of unity and stabilisation but as a potential defence of pluralism and innovation. The first part of the book is devoted to the analysis of the concept of constitution, highlighting the elements that can contribute from a socio-legal perspective, to clarifying the principle meanings attributed to the constitution. The study goes on to analyse some concrete aspects of the functioning of constitutions in contemporary society. In applying Luhmann's General Systems Theory to a comparative analysis of the concept of constitution, the work contributes to a better understanding of this traditional concept in both its institutionalised and functional aspects. Defining the constitution's contents and functions both at the conceptual level and by taking empirical issues of particular comparative interest into account, this study will be of importance to scholars and students of sociology of law, sociology of politics and comparative public law.
