Introduction to Mechatronic Design is ideal for upper level and graduate Mechatronics courses in Electrical, Computing, or Mechanical & Aerospace Engineering. Unlike other texts on mechatronics that focus on derivations and calculations, Introduction to Mechatronics, 1e, takes a narrative approach, emphasizing the importance of building intuition and understanding before diving into the math. The authors believe that integration is the core of mechatronics and students must have a command of each of the domains to create the balance necessary for successful mechatronic design and devote sections of the book to each area, including mechanical, electrical, and software disciplines, as well as a section on system design and engineering. A robust package of teaching and learning resources accompanies the book.

In the spirit of Dr. Strangelove and The Atomic Café, a blackly sardonic people's history of atomic blunders and near-misses revealing the hushed-up and forgotten episodes in which the great powers gambled with catastrophe Rudolph Herzog, the acclaimed author of Dead Funny, presents a devastating account of history's most irresponsible uses of nuclear technology. From the rarely-discussed nightmare of "Broken Arrows" (40 nuclear weapons lost during the Cold War) to "Operation Plowshare" (a proposal to use nuclear bombs for large engineering projects, such as a the construction of a second Panama Canal using 300 H-Bombs), Herzog focuses in on long-forgotten nuclear projects that nearly led to disaster. In an unprecedented people's history, Herzog digs deep into archives, interviews nuclear scientists, and collects dozens of rare photos. He explores the "accidental" drop of a Nagasaki-type bomb on a train conductor's home, the implanting of plutonium into patients' hearts, and the invention of wild tactical nukes, including weapons designed to kill enemy astronauts. Told in a riveting narrative voice, Herzog—the son of filmmaker Werner Herzog—also draws on childhood memories of the final period of the Cold War in Germany, the country once seen as the nuclear battleground for NATO and the Warsaw Pact countries, and discusses evidence that Nazi scientists knew how to make atomic weaponry . . . and chose not to. From the Hardcover edition.

The papers collected here are those selected for presentation at the Eighth IFIP Conference on Engineering for Human-Computer Interaction (EHCI 2001) held in Toronto, Canada in May 2001. The conference is organized by the International Federation of Information Processing (IFIP) Working Group 2.7 (13.4) for Interface User Engineering, Rick Kazman being the conference chair, Nicholas Graham and Philippe Palanque being the chairs of the program committee. The conference was co-located with ICSE 2001 and co-sponsored by ACM. The aim of the IFIP working group is to investigate the nature, concepts, and construction of user interfaces for software systems. The group's scope is: • to develop user interfaces based on knowledge of system and user behavior; • to develop frameworks for reasoning about interactive systems; and • to develop engineering models for user interfaces. Every three years, the working group holds a working conference. The Seventh one was held September 14-18 1998 in Heraklion, Greece. This year, we innovated by organizing a regular conference held over three days.

THERE existed from very early times a collection of Norse proverbs and wise counsels, which were attributed to Odin (Othin) just as the Biblical proverbs were to Solomon. This collection was known as "The High One's Words," and forms the basis of the present poem. Few gnomic collections in the world's literary history present sounder wisdom more tersely expressed than the Havamal. Like the Book of Proverbs it occasionally rises to lofty heights of poetry. If it presents the worldly wisdom of a violent race, it also shows noble ideals of loyalty, truth, and unfaltering courage. Over time other poems were added to the original content dealing with wisdom which seemed, by their nature, to imply that the speaker was Odin. Thus a catalogue of runes, or charms, was tacked on, and also a set of proverbs. Here and there bits of verse crept in; and of course the loose structure of the poem made it easy for any reciter to insert new stanzas almost at will. This curious miscellany is what we now have as the Havamal Five separate elements are pretty clearly recognizable: (1) the Havamal proper (stanzas 1-80), a collection of proverbs and counsels for the conduct of life; (2) the Loddfafnismol (stanzas 111-138), a collection somewhat similar to the first, but specifically addressed to a certain Loddfafnir; (3) the Ljothatal (stanzas 147-165), a collection of charms; (4) the lovestory of Odin and Billing's daughter (stanzas 96-102); (5) the story of how Odin got the mead of poetry from the maiden Gunnloth (stanzas 103-110). There is also a brief passage (stanzas 139-146) telling how Odin won the runes, this passage being a natural introduction to the Ljothatal, and doubtless brought into the poem for that reason. 33% of the net profit from the sale of this book will be donated to charities.

Since the time when interactive television emerged as a medium for the home environment,ithasbeenpermanentlyevolving.Changingrequirementsanduser behavior, e.g., the demand for being mobile and have access to information and entertainmentanywhereandanytime,arechallenginginteractiveTV.Newkinds of interactive services have to be conceived for the increasing mobile, ubiquitous requirements of the di?erent user groups. In these changing environments, a better understanding of emerging contexts and their implications is essential. This gave birth to the idea for the theme of the EuroITV 2008 Conference: "Changing Television Environments." EuroITV 2008, the 6th edition of the - ropean Conference on Interactive Television, was organized and hosted by the HCI and Usability Unit, ICT&S Center, University of Salzburg, Austria. The EuroITV Conference Series started at Brighton University in 2003 and 2004. It was followed by Aalborg University in 2005, Athens University of Economics and Business in 2006 and by CWI (Centrum Voor Wiskunde en Informatica) in Amsterdam 2007. We would like to thank all former Chairs for making this greatconference series happen andfor providing us with the opportunity to host EuroITV 2008.
