A guide to putting cognitive diversity to work Ever wonder what it is that makes two people click or clash? Or why some groups excel while others fumble? Or how you, as a leader, can make or break team potential? Business Chemistry holds the answers. Based on extensive research and analytics, plus years of proven success in the field, the Business Chemistry framework provides a simple yet powerful way to identify meaningful differences between people's working styles. Who seeks possibilities and who seeks stability? Who values challenge and who values connection? Business Chemistry will help you grasp where others are coming from, appreciate the value they bring, and determine what they need in order to excel. It offers practical ways to be more effective as an individual and as a leader. Imagine you had a more in-depth understanding of yourself and why you thrive in some work environments and flounder in others. Suppose you had a clearer view on what to do about it so that you could always perform at your best. Imagine you had more insight into what makes people tick and what ticks them off, how some interactions unlock potential while others shut people down. Suppose you could gain people's trust, influence them, motivate them, and get the very most out of your work relationships. Imagine you knew how to create a work environment where all types of people excel, even if they have conflicting perspectives, preferences and needs. Suppose you could activate the potential benefits of diversity on your teams and in your organizations, improving collaboration to achieve the group's collective potential. Business Chemistry offers all of this--you don't have to leave it up to chance, and you shouldn't. Let this book guide you in creating great chemistry!

Sport events are inextricably linked to the places in which they are hosted. High-profile events require high-quality venues, and the proper management of facilities is crucial to their success. Now in a fully revised and updated new edition, *Managing Sport Facilities and Major Events* is still the only textbook to introduce the fundamentals of sport facility and event management in an international context. With detailed real-world case studies and insights from professional practice, this book offers a systematic guide to the management issues and practical problems that sports managers must address to ensure financial, sporting, and ethical success. It covers all the key aspects of sport facility and major event management including the bidding process, facility development, risk analysis, budgeting, marketing, branding, and quality assurance, as well as completely new chapters on analytics, impact, and legacy. Now supported by a companion website containing slides, test banks, a glossary, and sample syllabus, this is an invaluable resource for students and practitioners alike and is essential to any course on sport facilities, event management or sport administration.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.

As the population ages and more people with disabilities seek to drive, occupational therapists will increasingly need to address this instrumental activity of daily living with their clients. The OT-DORA Battery is a unique, user-friendly, and convenient collection of assessments that allows efficient evaluation of an individual's cognitive, perceptual, behavioral, physical, and sensory skills and abilities that are related to driving, prior to an on-road assessment. The OT-DORA also offers the ability to screen clients who are unsafe to take an on-road assessment. Done easily in a clinical setting, without driving simulators or taking the client on-road, the OT-DORA Battery allows practitioners to, with minimal risk and expense, find clients' strengths and weaknesses and pinpoint areas on which to focus during rehabilitation. The manual describes how the OT-DORA was developed, summarizes research to support its use, and details instructions on how to administer the Battery with clients. A flash drive contains downloadable and writable versions of the administration and client response booklets for use in the United States, Canada, the United Kingdom, and Australia. Sections of the assessment include- Initial Interview Medical History Medication Screen Sensory Assessments-for communication and hearing, vision, and proprioception Physical Assessments-for motor skills, balance, and endurance Cognitive Assessments Summary of Issues Further Assessments. The OT-DORA Battery can be administered by generalist and specialist occupational therapists as well as by other health professionals with specialized training, experience, and certification in driver assessment, as well as by driver rehabilitation professionals with specialized training in determining how health-related changes can affect performance skills and elicit patterns that may compromise driving ability.

"Professional engineers can often be distinguished from other designers by the engineers' ability to use mathematical models to describe and 1 analyze their products." This observation by Parnas describes the de facto professional standards in all classical engineering disciplines (civil, mechanical, electrical, etc.). Unfortunately, it is in sharp contrast with current (industrial) practice in software design, where mathematical models are hardly used at all, even by those who, 2 in Holloway's words "aspire to be engineers." The rare exceptions are certain critical applications, where mathematical techniques are used under the general name formal methods. Yet, the same characteristic that make formal methods a necessity in critical

applications make them also advantageous in everyday software design at various levels from design efficiency to software quality. Why, then, is education failing with respect to formal methods? -- failing to convince students, academics and practitioners alike that formal methods are truly pragmatic; -- failing to overcome a phobia of formality and mathematics; -- failing to provide students with the basic skills and understanding required to adopt a more mathematical and logical approach to software development. Until education takes these failings seriously, formal methods will be an obscure byway in software engineering, which in turn will remain severely impoverished as a result.

The cannabis industry is seeing an explosion of entrepreneurship and a great amount of capital is flowing into the sector globally. It is essential for cannabis business owners to understand how to be one of the few businesses that secure funding. The answer to bridging this disconnect lies in not only understanding how to build a successful business but, directly listening from investors on what is required when backing a company. And most importantly, why they invest in certain companies, entrepreneurs and not others. Cannabis Capital is the definitive resource outlining the fundamentals for building a company that will attract investment, why investors will invest and how to successfully raise capital. Ross O'Brien brings more than a decade of investing in private companies, managing a \$50 million cannabis investment fund, hosting cannabis industry events, as well as investor forums. O'Brien shares the best practices and shares proven frameworks for success.
