Finalist for the Pulitzer Prize and the National Book Critics Circle Award in Biography • “One of the most beautiful biographies I've ever read.” —Glennon Doyle, author of #1 New York Times Bestseller, *Untamed* The highly anticipated biography of Sylvia Plath that focuses on her remarkable literary and intellectual achievements, while restoring the woman behind the long-held myths about her life and art. With a wealth of never-before-accessed materials, Heather Clark brings to life the brilliant Sylvia Plath, who had precocious poetic ambition and was an accomplished published writer—even before she became a star at Smith College. Refusing to read Plath’s work as if her every act was a harbinger of her tragic fate, Clark considers the sociopolitical context as she thoroughly explores Plath’s world: her early relationships and determination not to become a conventional woman and wife; her troubles with an unenlightened mental health industry; her Cambridge years and thunderclap meeting with Ted Hughes; and much more. Clark’s clear-eyed portraits of Hughes, his lover Assia Wevill, and other demonized players in the arena of Plath’s suicide promote a deeper understanding of her final days. Along with illuminating readings of the poems themselves, Clark’s meticulous, compassionate research brings us closer than ever to the spirited woman and visionary artist who blazed a trail that still lights the way for women poets the world over.

At its best, educational television can provide children with enormous opportunities and can serve as a window to new experiences, enrich academic knowledge, enhance attitudes and motivation, and nurture social skills. This volume documents the impact of educational television in a variety of subject areas and proposes mechanisms to explain its effects. Drawing from a wide variety of research spanning several disciplines, author Shalom M. Fisch analyzes the literature on the impact of educational resources. He focuses on television programs designed for children rather than for adults, although adult literature is included when it is particularly relevant. In addition, much of the discussion concerns the effects of unaided viewing by children, rather than viewing in the context of adult-led follow-up activities. The role of parent-child co-viewing and issues relevant to the use of television in school or child care also receives consideration. This volume is intended to make the disparate literature on educational television's impact more accessible, by bringing it together into a centralized resource. To that end, the volume draws together empirical data on the impact of educational television programs--both academic and prosocial--on children's knowledge, skills, attitudes, and behavior. In addition to its emphasis on positive effects, this volume addresses a gap in the existing research literature regarding children's learning from exposure to educational television. Acknowledging that little theoretical work has been done to explain why or how these effects occur, Fisch takes a step toward correcting this situation by proposing theoretical models to explore aspects of the mental processing that underlies children's learning from educational television. With its unique perspective on children's educational television and comprehensive approach to studying the topic, this volume is required reading for scholars, researchers, and students working in the area of children and television. It offers crucial insights to scholars in developmental psychology, family studies, educational psychology, and related areas.
