PRESENTATION: ROLEX DAY-DATE, THE "PRESIDENT'S WATCH" The Rolex Day-Date is the first wristwatch which indicates the date and the day of the week. In 1956 Rolex presents one of its most successful and most popular watches ever: the Day-Date,. This model is one of the world's most famous Rolex watches; classic, beautiful, functional, useful and elegant. In 2008 a new chapter of this watch, the Day-date II (ø 41 mm) and in 2015 the new Day-Date 40. Known as "President's Watch", this Rolex Day-Date has characterized and influenced the history of horology with developments and innovations during the years. With high definition unreleased images, technical details, dials variants, history and updated price of every model, this book analyses every reference from 1956 until today. TOPICS In this book the authors examine calibers, dials, cases, bracelets and many more components of every model. We can read from an official Rolex document: « THE BIRTH OF THE "DATEJUST" AND THE "DAY-DATE" Not satisfied with having realized a selfwinding waterproof watch, we decided to dedicate ourselves to studying the calendar watch. This is how the "Datejust", which clearly indicates the date on the dial in a small aperture with a Cyclops lens which enlarges it so as tomake it easier to read, was born. The next stage was the launch of the "Day-Date", a perfected model which also indicates, with letters, the days of the week. The day and the date automatically change every evening at midnight. » These are the words of Roger Federer, a living tennis legend, about his Day-Date II: "The reason I like my Day-Date so much is because it is a legendary watch, elegant but with a certain spirit, with a touch ofmodernity added to its stylish black dial".

For more than a century, Rolex stands apart as the most coveted and most legendary

brand of watches in the world. A Rolex connotes many things: the quintessence of the luxury timepiece, a tool of power for movers and shakers, the symbol of passage into adulthood. New labels pop up, styles come and go, but the brand at the top never changes. Ever the record setter—the Daytona that had belonged to Paul Newman was auctioned by Phillips in New York in October 2017 for \$17.8 million—it comes as no surprise that Rolex is the most collected watch label in the world. The history of Rolex is rooted in the visionary spirit of its founder, Hans Wilsdorf. In 1905, young Wilsdorf founded a company in London for the distribution of timepieces, but his true dream was to produce wristwatches—in their infancy at the time, and not very precise—that would be technically durable and reliable, and supremely elegant. The company first concentrated on producing the highest quality movements, and this quest for precision rapidly led to the first wristwatch in the world to receive the Swiss Certificate of Chronometric Precision, granted by the Official Watch Rating Centre in Bienne in 1910. Four years later, Kew Observatory in Great Britain awarded a Rolex watch a class A certificate, a distinction that had been previously reserved exclusively for marine chronometers. From that date forward, the Rolex wristwatch has been synonymous with precision. Over the last 100 years, Rolex milestones include: the first waterproof watch, the first self-winding mechanism, the first wristwatch to fly over Mt. Everest, the first diver's watch waterproof to 100 meters, the first to withstand magnetic fields of 1,000 gauss, the first to descend the Mariana Trench. Selected by specialist Fabienne Reybaud, each of the exceptional Rolex watch models in this beautiful handcrafted Ultimate Collection volume showcase the most valuable and technically innovative models the luxury watchmaker has produced, including watches never seen in print before: From the first wristwatch dating to the early 1900s and the first Oyster Perpetual from 1931, to an Explorer worn during Sir Edmund Hillary's expedition to the summit of Mt. Everest in 1953 and the Submariner worn by actor George Lazenby in the James Bond film On Her Majesty's Secret Service, they are sure to astonish collectors the world over. The brand with the crown is recognized worldwide as an invaluable sports implement and luxury product. In little more than one hundred years, it has become one of the most successful and innovative watch brands on the planet. Rolex manufactures more than a half a million wristwatches per year while maintaining an outstanding reputation and near-perfect quality. From the beginning, the sponsorship of statesmen, movie stars, and athletes has driven its success, but the company has expanded to include more than just the rich and famous. The Rolex Oyster became the first watch to defy the elements when, in 1927, Mercedes Gleitze wore one while she swam the English Channel. In 1933, the company patented the first automatic winding mechanism. Learn more about this history and read updated reports written about new Rolex ideas and performance tests featured in the German watch magazine Armbanduhren (Wristwatch) from the past 15 years.

ROLEX PASSION TOPICS: Rolex Passion describes on more than 350 pages the whole production of the Genevan Maison from the first models up to the present day. This book also illustrates important details, small differences, special features of bezels, dials and hands and a lot more. Rolex Passion is divided in categories in alphabetic order and represents a general guideline, which describes all the references, but also satisfies the demands of those who require more detailed information, for example: the customized Serpico y Laino dials, the chronographs, which were produced only in very small numbers, the characteristics of the Paul Newman models, watches with tropical dials, the calibers, the timepiece, which was called "Padellone," the evolution and the range of dials of the Datejust and Day-Date, the Texano, the complications of the Sky-Dweller, the evolution of the diver's models from the James Bond up to the James Cameron, the Oysterflex, the ceramic bezel inserts (including those of the modern Daytona), etc. The last chapters describe all the models, which were presented at Baselworld, like for example the Sea-Dweller, ref. 126600 with red writing, the new Sky-Dweller in stainless steel with a blue dial, the Yacht-Master with a sapphire and diamond set bezel and a lot more. The chapter "Shots from the Web" is absolutely new. It illustrates photos of Rolex watches from all over the world: models, which are rare or common, modern or vintage, in good or less good condition, are presented on different and original backgrounds.

"Rolex was established in 1908, a century ago, so one hundred years have passed from that day to the publication of this volume in which the author, John Goldberger, illustrates what he considers to be the 100 most beautiful examples ever produced. One hundred years of life, and one hundred examples, traced back through time thanks to painstaking research, with the collaboration of some of the most renowed collectors in the world, and photographed to show the characteristics of the movement, case and dial of each example in the best possible way. The top one hundred, we could say, also to narrow down the field of research, which would otherwise have been incredibly vast, to grasp the essence of a brand that has probably contributed more than any other to the development of the wristwatch. Giampiero Negretti Over 700 colour illustrations and 400 descriptions provide the collector and watch enthusiast with invaluable information on reference numbers, watchcases, faces, movements, related calibres and the year of production of each watch. The book is divided into seven chapters: Watches with a destiny; Oyster; Chronograph and moon phases; Oyster chronograph and moon phases; Datejust, Day-Date; Sport Models; Cosmograph."--BOOK JACKET. In this virtual catalog of Rolex wristwatches, collectors and buyers will find 3,621 wristwatches in over 14 different model lines: Oyster, Bubbleback, including Chronograph, Submariner, Explorer, and more. Each watch is shown in full color, with the most important technical details as well as reference numbers, and year of manufacture provided. This variety of information is of inestimable worth for the

wristwatch collector and buyer. In one place, for example, they can see the typical Oyster from the 1940s and nearly all the case and dial variations that were available. The same applies to all the lines made by Rolex. In short, for everyone who collects Rolex or only wants to acquire a beautiful vintage wristwatch with the crown, this book an absolute must. An illustrated history of the Rolex waterproof wristwatch is included. PRESENTATION: STAINLESS STEEL ROLEX This book is about all stainless steel Rolex watches, both modern and vintage models. The stainless steel is an alloy, mainly composed of iron and carbon, which is resistant, shiny, but above all... fashionable. A Rolex watch must work and perform even in the most hostile environment. With the passing of time, the techniques of stainless steel production have continuously evolved. Therefore there are different types of steel which have been used by Rolex (i.e. Rolesium: a Rolex patent from 21 May 1932 to arrive today to 904L steel). Technical details, historical profiles, characteristics of all Rolex watches in stainless steel will satisfy your professional needs and will also represent a useful guide to invest in these watches.
