An overview of generations of Italians in the Big Apple, weaving together numerous stories from different epochs and different backgrounds. "If you want to learn something about Italian creativity, come to New York. Here, you will find the pride of flying the Italian colors at the Fifth Avenue Columbus Day Parade, the American patriotism of those who perished at Ground Zero, the courage of firefighters and marines on the frontline of the war against terrorism, the babel of dialects at the Arthur Avenue market, portrayals of social change in the writings of Gay Talese, stories of successful business ventures on the TV shows of Maria Bartiromo and Charles Gasparino, political passion in the battles of Mario Cuomo and Rudy Giuliani, creative imagination in the works of Gaetano Pesce, Renzo Piano and Matteo Pericoli, and provocation in the attire of Lady Gaga... The Midtown top managers, who arrived in the past twenty years, operate in the XXI century, while on Fresh Pond Road in Ridgewood the panelle are still prepared according to the Sicilian recipes transmitted from one generation to the next." (From the "Introduction")

Now, with the world in shambles and dark, nightmarish clouds billowing over the wastelands, they have been tapped for an incredibly perilous mission. But they quickly realize that this assignment is more complex than it seems, and before it is over they will have encountered everything from mimes, ninjas, and pirates to one ultra-sinister mastermind, whose only goal is world domination.

This second volume of ReConFort, published open access, addresses the decisive role of constitutional normativity, and focuses on discourses concerning the legal role of constitutional norms. Taken together with ReConFort I (National Sovereignty), it calls for an innovative reassessment of constitutional history drawing on key categories to convey the legal nature of the constitution itself (national sovereignty, precedence, justiciability of power, judiciary as constituted power). In the late 18th and early 19th centuries, constitutional normativity began to complete the legal fixation of the entire political order. This juridification in one constitutional text resulted in a conceptual differentiation from ordinary law, which extends to alterability and justiciability. The early expressions of this 'new order of the ages' suggest an unprecedented and irremediable break with European legal tradition, be it with British colonial governance or the French ancien régime. In fact, while the shift to constitutions as a hierarchically 'higher' form of positive law was a revolutionary change, it also drew upon old liberties. The American constitutional discourse, which was itself heavily influenced by British common law, in turn served as an inspiration for a variety of constitutional experiments - from the French Revolution to Napoleon's downfall, in the halls of the Frankfurt Assembly, on the road to a unified Italy, and in the later theoretical discourse of twentieth-century Austria. If the constitution states the legal rules for the law-making process, then its Kelsenian primacy is mandatory. Also included in this volume are the French originals and English translations of two vital documents. The first - Emmanuel Joseph Sieyès' Du Jury Constitutionnaire (1795) - highlights an early attempt to reconcile the democratic values of the French Revolution with the pragmatic need to legally protect the Revolution. The second - the 1812 draft of the Constitution of the Kingdom of Poland - presents the 'constitutional propaganda' of the Russian Tsar Alexander I to bargain for the support of the Lithuanian and Polish nobility. These documents open new avenues of research into Europe's constitutional history: one replete with diverse contexts and national experiences, but above all an overarching motif of constitutional decisiveness that served to complete the juridification of sovereignty. Perché mai una Costituzione del mondo? Perché ci sono emergenze e catastrofi globali, come la pandemia tuttora in atto, che non fanno parte dell'agenda politica dei governi nazionali, anche se dalla loro soluzione dipende la sopravvivenza dell'umanità: il riscaldamento climatico e gli inquinamenti globali dei mari e dell'aria, di cui soffrono soprattutto le popolazioni dei paesi poveri benché siano prodotti dallo sviluppo insostenibile dei paesi ricchi; le guerre e i pericoli di catastrofi e conflitti nucleari determinati dalle migliaia di testate atomiche tuttora presenti sul pianeta; la crescita delle disuguaglianze e della povertà e la morte ogni anno di milioni di persone per mancanza di alimentazione di base e di farmaci salva-vita; la produzione e la diffusione di armi che ogni anno provocano guerre e centinaia di migliaia di omicidi; il dramma, infine, di masse crescenti di migranti che fuggono da queste tragedie per poi incontrare, quando non perdono la vita nelle loro terribili odissee, l'oppressione razzista dovuta alle loro personali identità differenti. Soltanto la stipulazione di un nuovo patto globale di

pacifica convivenza, di mutuo soccorso e di rispetto e tutela della natura è in grado, realisticamente, di garantire l'abitabilità della Terra e il futuro all'umanità.

Lung disease is a major indication for the admittance of the neonate to a specialist intensive care unit, and is a particularly common complication in the pre-term baby where the lungs are insufficiently developed at birth and easily damaged by early treatments. As a consequence, this is an area of intensive international research activity. In this comprehensive update of the well-received first edition, leading researchers from all over the world have been invited to contribute in their specialist areas. The book continues to provide detailed coverage of the pathogenesis, clinical and laboratory features and management of lung disorders in the neonate, with increased emphasis on the underlying immunology and major additions to the sections on respiratory support, chronic lung disease and abnormalities in lung growth and development to reflect the changes that have occurred in these areas since the previous edition appeared in 1995. Providing an unrivalled up-to-date statement on the problems that are faced in the neonatal intensive care unit on a daily basis, this is an invaluable addition to the bookshelves of neonatologists and other personnel involved in the care of critically ill babies.

Questo volume affronta gli aspetti clinici, assistenziali e organizzativi del trattamento del neuroleso grave: dal primo soccorso fino alla donazione degli organi a scopo di trapianto, nel caso di arresto irreversibile delle funzioni cerebrali. Nel libro particolare attenzione viene posta all'accoglienza del paziente e alla comunicazione con i familiari, e viene

evidenziato il carattere fondamentale del prelievo di organi a scopo di trapianto, quale continuità assistenziale. Guida utile per chi opera nei reparti di terapia intensiva, di rianimazione, neurochirurgia, pronto soccorso e centri di coordinamento trapianti, è completato da appendici con ricca modulistica, linee guida nazionali e normative di pertinenza. In the past few years, constitutional courts have been presented with new challenges. The world financial crisis, the new wave of terrorism, mass migration and other country-specific problems have had wide-ranging effects on the old and embedded constitutional standards and judicial constructions. This book examines how, if at all, these unprecedented social, economic and political problems have affected constitutional review in Europe. As the courts' response must conform with EU law and in some cases international law, analysis extends to the related jurisprudence of the European Court of Justice and the European Court of Human Rights. The collection adopts a common analytical structure to examine how the relevant challenges have been addressed in ten country specific case studies. Alongside these, constitutional experts frame the research within the theoretical understanding of the constitutional difficulties of the day in Europe. Finally, a comparative chapter examines the effects of multilevel constitutionalism and identifies general European trends. This book will be essential reading for academics and researchers working in the areas of constitutional law, comparative law and jurisprudence.

La rivista AmbienteDiritto sin dalla sua nascita (oltre 20 anni fa) si propone di accompagnare sia da un punto di vista giurisprudenziale, che dottrinario gli operatori del diritto nello studio dell'affascinante e poliedrica "metamateria" rappresentata dal diritto ambientale. Forti di questa esperienza, fra i primi abbiamo posto il problema del governo dell'emergenza nella società del rischio, che è tema, come purtroppo noto, di sempre più rilevante attualità. In tempi non sospetti abbiamo organizzato a Roma, con il patrocinio degli organi parlamentari, il Convegno "Emergenza e Tutela ambientale" ed abbiamo immaginato insieme all'Editore della Rivista di inaugurare una collana di volumi "stampati" che possa raccogliere sul tema contributi e idee di cultori della materia per offrirli alla riflessione di un più vasto pubblico. Questo primo volume, raccoglie alcuni dei numerosi contributi che sono stati esposti al Convegno insieme ad altri saggi che hanno già trovato spazio nelle pagine della rivista on-line (www.ambientediritto.it). Tuttavia, non potevamo non fare riferimento all'attualità e all'emergenza determinata dal CORONAVIRUS. Nel cercare di individuare un filo conduttore ai saggi contenuti in questo volume, anche se le questioni esaminate riguardavano prevalentemente argomenti attinenti alle emergenze variamente aggettivate come emergenza ambientale, energetica, sismica ... sono affiorate convergenti istanze volte ad affrontarne la complessiva problematica, avvertendosi l'opportunità di un assetto unitario della regolazione delle sospensioni costituzionali e delle deroghe a quel che è rimasto del simulacro principio di legalità (P. Grossi, Ritorno al diritto). Ciò per rispondere all'esigenza che, secondo Costantino Mortati, al fine di «evitare quanto possibile l'arbitrio e mantenere anche nei casi di emergenza alcune garanzie formali proprie dello Stato di diritto», avrebbe indotto «ad includere nelle costituzioni contemporanee una qualche disciplina delle sospensioni stesse per quanto riguarda sia l'organo competente a dichiarare la sussistenza degli eventi straordinari e ad assumere i poteri dai medesimi richiesti, sia le modalità di emissione e le specie delle misure destinate a fronteggiarli, sia i controlli sulle medesime» (Costituzione - Dottrine generali, in E.d.d., XI, Milano, 1962, p.194).

Hundreds of high-quality intra-operative photos of fresh human cadavers create a uniquely realistic step-by-step guide to surgical trauma procedures.

A cura di Anna Maria Ferrari e Cinzia Barletta Il presente volume di Medicina di Emergenza-Urgenza, redatto dalla Faculty della Società Italiana di medicina di Emergenza-Urgenza - SIMEU, si propone come testo aggiornato, Evidence Based, per la gestione delle emergenze. Il paziente viene seguito dalla fase di allarme, sul luogo dell'evento, al trasferimento all'ospedale più appropriato fino al setting di cura definitiva, tracciando il percorso clinico assistenziale nella fase preospedaliera ed ospedaliera in continuità di soccorso.

The new edition of Major Incident Medical Management and Support is a vital component in the blended learning course from Advanced Life Support Group (ALSG), which aims to provide hospital staff at all levels with essential information on the preparation, management and support elements of dealing with casualties in a major incident. Split into five sections, each focuses on the elements requisite in preparing for, and responding, to a major incident. The first section discusses the epidemiology and incidences of major incidents and the structured approach to the hospital response. The second section contains the preparation required in planning for major incidents, including equipment and training. The third section covers the management of a major incident, concentrating on the clinical, nursing and management hierarchies. The fourth includes the various stages of support in a major incident, including declaring an incident and activating the plan, the reception, triage, definitive care and recovery phases of an incident. The final section focuses on special incidents which require additional consideration, including those involving hazardous chemicals, burns and children. Written in collaboration with the National Emergency Planning, Major Incident Medical Management and Support is an

invaluable reference in the emergency department and beyond for staff needing to prepare for the rare, but inevitable, hospital major incidence response.
